**The History Department at the Sorbonne University Abu Dhabi, in collaboration with the National Archives in Abu Dhabi and French institutions as well – (Ecole Nationale des Chartes, Archives Nationales de France, Archives diplomatiques du Ministère des Affaires étrangères, Professional Masters such as MECADOC) – designed this academic programme to meet with the market needs to train prospective professionals in the records management and digital archiving fields. The programme learning outcomes abides by the QFE expectations and has also been designed according to the academic and professional needs for this kind of degree.**

## **Sorbonne University in Paris**

- Sorbonne University is the main inheritor of the old Sorbonne, which dates back to the 13<sup>th</sup> century. It was one of the first universities in the world.
- The largest institution in France dedicated to the study of literature, languages, civilizations, arts, humanities and social sciences is located on the original medieval foundations, and now extends to the Latin Quarter and to other areas in Paris.
- Shanghai World University Rankings 2021 Sorbonne University: no 35 in the world; no 2 in France

## **The National Archives in Abu Dhabi**

- In just over forty years, the National Archives has achieved a pioneer status as the first of its kind in the Middle East and the sixth in the world, due to its adoption of the latest technologies available to accomplish its mission. It is one of the oldest cultural institutions in the United Arab Emirates and the largest documentation organization in the Arabian Gulf region.
- In addition to its role in documentation and archiving, the National Archives provides intellectuals with a variety of publications that explore both authentic cultural and contemporary issues in history and heritage.
- The National Archives collects valuable historical material relating to the United Arab Emirates in particular and the Arabian Gulf states in general. It also documents, indexes and translates the material collected, that it uses to publish specialised historical research. Moreover, it hosts and organizes local, regional and international conferences and symposiums, in addition to holding related exhibitions both locally and abroad.

## **Sorbonne University is a membership of the ICA**

- The ICA believes that effective records and archives management is an essential precondition for good governance, the rule of law, administrative transparency, the preservation of mankind's collective memory, and access to information by citizens.
- The International Council on Archives (ICA) is dedicated to the effective management of records and the preservation, care and use of the world's archival heritage through its representation of records and archive professionals across the globe.

# Programme overview

## Bachelor degree in Archives and Records Management:

This programme is a three-year undergraduate bachelor degree programme that offers students a well-rounded training in the field of archival and records management that equips them to work in public and private organisations. In cooperation with the National Archives in Abu Dhabi, the bachelor programme is designed to provide dynamic learning for careers in archives. It offers an overview of archival legislations, archiving standards, management of current, semi-current archives, records keeping theory and management practices, and the technology involved in the records management and information retrieval theory. It develops an understanding of the processes of information handling and use within UAE organisations, assists in acquiring the basic principles of records management and archives, and explores their application to professional practice. Students are also prepared for preservation of archival materials and archival management of electronic records.

## Academic and professional skills:

The Bachelor in Records Management & Archival Science is unique in the UAE, in part, because it offers a professional training in a very strategic field for public and private companies. This programme allows students to develop a wide range of skills that are highly demanded by employers:

- Offering an overview of archival legislations, archiving standards, management of current, semi-current and electronic archives, records keeping theory and management practices, and the technology involved in the records management and information retrieval theory
- Understanding the processes of information handling and use within UAE organisations
- Assisting in acquiring the basic principles of records management and archives, exploring their application to professional practices
- Preparing for preservation of archival materials and archival management of electronic records
- Acquiring technical and professional skills by using IT tools and softwares dedicated to records management; by learning strategic tools such as quantitative methods and statistics
- Improving linguistic skills

The extensive scope of this professional programme ensures that students build a comprehensive understanding of the theories and methods for controlling the creation, capture and classification of documents and records through their lifecycle. Moreover, it provides scientific knowledge and skills for appraising, collecting, classifying, describing, managing and preserving authentic archives in all media formats to serve business, economic, administrative, legal, and the historical needs of public and private organisations and citizens. Students will learn the specific historical, administrative and legal parameters relating to the production of records and archives, especially in the context of the UAE and beyond. They will also analyse the current problems and issues in record keeping and archive administration using appropriate electronic management tools. Evaluating the professional, ethical and legal requirements for the processes of acquisition, arrangement, accession and dissemination of records and archives is also a key learning outcome for careers related to this field.

Beyond the fundamental archival courses, students will also gain technical, digital and professional skills for administrative, business and management purposes. Professors and professionals help students develop essential critical thinking and decision-making skills related to all forms of records, to manage and preserve authentic and trustworthy records and archives for business, government, public needs, scientific research, or for the protection of cultural heritage. Students will gain a well-rounded experience due to semestrial applied works and a long internship in private or public companies in the UAE, with the support of the National Archives.

## Accreditation and Award

This programme provides specialism in **Records Management & Archival Science**. This degree has been accredited by the French Ministry of Education and by the UAE Ministry of Education in August 2020. The degree certificate is awarded by **Sorbonne University** in Paris. In the French Academic System this specialization is usually related to history, due to a long-standing tradition of historical record keeping and archiving. However, the degree mainly focuses on topics in records management and archival science in a professional context. Its complete title is Bachelor in the Field of **Human and Social Sciences**, Area: **History**, Specialty: **Records Management and Archival Science**. On the French degree certificate, all the above degree title in bold will be stated as follows: Licence dans le domaine des Sciences Humaines et Sociales, Mention: Histoire, Parcours: Records Management et Archivistique. All the transcripts will be in English.

## Code: RMAS

Academic Years	2021-2024
Level	Undergraduate
Credits and Duration	180 ECTS credits taken over 6 semesters - 36 months full time.

Please note, this programme is delivered in English and students are provided with their programme structure and course descriptions in English. However, for some specific courses related to the UAE archival law for instance, knowledge of Arabic is a pre-requisite. For such courses, the terminology used and the bibliography are in Arabic. This linguistic skill will also be important for the applied works at the National Archives or at other Emirati institution because the Arabic is the language of administration.

### Career prospects

According to an expert in Archives, Mr. Abdelkrim Badjadja, former General Director of the National Archives in Algiers and archival expert in the UAE for 15 years, more than 5000 thousand persons need to be trained carefully<sup>1</sup>.

This **Bachelor in Records Management & Archival Science is unique in the UAE** and offers a professional training in a key field for public, governmental and private companies (cf. 1.2 : Demand and supply in the UAE about this programme). All the sectors in the UAE need to hire specialists in records management and archiving:

- UAE Ministries (defense, foreign affairs, presidential affairs, interior, finance, energy and industry, DCT...)
- Public and governmental entities (national archives, ADNOC, municipalities, insurance authority, telecommunications, museums, cultural institutions, college, etc.)
- Private companies (bank industries, industries, etc.)
- Health Services (hospitals, clinics, etc.)

The bachelor degree in records management and archives is required for candidates who wish to pursue a career as an archivist (digital and physical), digital asset manager, electronic records manager or a metadata specialist. Opportunities exist in cultural institutions, general management and administration, government agencies, health, service industries, public and private organisations, multinational companies and NGOs.

Consequently, the employability of students graduating from the Bachelor in Records Management and Archival Science will be very high in the UAE. This will be facilitated by the final professional internship, during the 3rd year of the programme, because the students will work in private, governmental or public companies according to their own preferences and the job opportunities offered by these entities.

# Permanent academic & administrative staff

## **Salma Ibrahim - Bachelor in Records Management and Archival Science Coordinator**

[Salma.Ibrahim@sorbonne.ae](mailto:Salma.Ibrahim@sorbonne.ae)

## **Dr Yann Rodier - Head of History Department in charge of the Records Management and Archival Science programmes**

[yann.rodier@sorbonne.ae](mailto:yann.rodier@sorbonne.ae)

Dr Yann Rodier is head of the History department at the Sorbonne University Abu Dhabi (SUAD) and Assistant Professor. He is currently in charge of the academic and professional programmes related to records management and archival science at SUAD. He also developed research academic projects in this field such as the international conference dedicated to the Digital Humanities in the Arab World at SUAD in October 2019, in cooperation with the CEDEJ (Cairo). He defended a PhD in early Modern History published in January 2020 under the following title: *Les raisons de la haine. Histoire d'une passion dans la France du premier XVIIe siècle (1610-1659)*. This research attempted to study the scientific history of passions, the history of emotions – especially xenophobia – and the history of prejudices and stereotypes. His perspective on research has been broadened by studying the Gipsy minorities in Europe. Another current research in the UAE is focused on the French diplomacy in the Gulf (Persia, Sultanate of Oman, Yemen) in the 17-18th c."

## **Dr Forget Chaterera-Zambuko - Assistant Professor in Records Management & Archival Science – Referee for the L3 internships and for the Master in Records Management and Archival Studies programme**

[forget.zambuko@sorbonne.ae](mailto:forget.zambuko@sorbonne.ae)

Dr Forget Chaterera-Zambuko is a Doctor of Literature and Philosophy in Information Science. She holds a Master in Information Science, Masters in Museum Studies, Bachelor Honours Degree in Archaeology and a Postgraduate Diploma in Tertiary Education. She is currently a Lecturer in the Department of Records and Archives Management at the National University of Science and Technology (NUST) in Zimbabwe, an affiliated Research Fellow in the Department of Information Science at the University of South Africa (UNISA) and a Postdoctoral Fellow in the History Department at Sorbonne University in Abu Dhabi. She is a rated researcher in the Y category by the National Research Foundation of South Africa. Forget Chaterera-Zambuko serves in the International Council on Archives' (ICA) New Professional Programme (2019 – 2020 cohort). She was Zimbabwe's lead researcher for the InterPARES Project Africa Team Phase four. Her research interests include access and use of documentary heritage, displaced archives, archival diplomatics, blockchain and other emerging technologies. She is a prolific researcher who has published journal articles, book chapters and presented her research findings in local, regional and international conferences, seminars and workshops.

## **Dr Victor Kabata - Postdoc in Records Management & Archival Science – Referee for the Foundation Year Programme**

[victor.kabata@sorbonne.ae](mailto:victor.kabata@sorbonne.ae)

Dr Victor Kabata is a holder of Doctor of Philosophy in Information Studies, a Masters in Records Management and Archives Administration and a Bachelor of Science Degree in Information Science. He is currently a Principal Archivist at Kenya National Archives, a lecturer at the Department of Education at the University of Embu, Kenya and a Postdoctoral Fellow in the History Department at Sorbonne University, Abu Dhabi. Victor is a prolific researcher who has contributed to the academic discourse of information science through academic publications and conference presentations. His research interests are records management, information for development, freedom of information, cloud computing, data protection among others.

# Permanent academic & administrative staff

## **Dr Mehluli Masuku - Postdoc in Records Management & Archival Science**

[mehluli.masuku@sorbonne.ae](mailto:mehluli.masuku@sorbonne.ae)

Dr Mehluli Masuku is a postdoc student in the programme of Records Management and Archival Science in the Department of History at Sorbonne University Abu Dhabi and a Lecturer in the Department of Records and Archives Management at the National University of Science and Technology, Zimbabwe. He holds a PhD in Information Science from the University of South Africa. He has over twelve years of academic experience in a university setting where he started off as a Teaching Assistant and Staff Development Fellow in the Department of Records and Archives Management at the National University of Science and Technology through to 2014 when he was appointed a Full Time Lecturer in the same Department and University. Mehluli has thirteen articles in internationally recognised peer reviewed journals, two book chapters and one conference proceedings. Between 2013 and 2017, Mehluli served as a member of the Team Africa Research Group in the International Research on Permanent Authentic Records in Electronic Systems (InterPARES) 4 Project that was coordinated from South Africa, South Africa and the University of British Columbia, Canada. Since 2014, he has been involved in the supervision of undergraduate and masters' dissertations in the Department of Records and Archives Management at NUST as well a range of other activities such as curriculum development and review, coordination of masters research projects, work-related learning as well as career guidance. His research interests include, but not limited to health records and information management, research methodologies and training and professional issues in records management and archival science. As part of academic citizenship, Mehluli serves as a reviewer for various records and archives management journals and publishers, including Information Development, ESARBICA journal, IGI Global, SASA Journal, MOUSAION South African Journal of Information Studies as well as SAJCIS. He is also a member of the current ESARBICA Journal Editorial Committee and serves as an external examiner at the University of South Africa. Owing to his interests and expertise in health records management, Mehluli has also offered some academic and expert opinions about the retention and disposal of medical records to the National Archives of Zimbabwe.

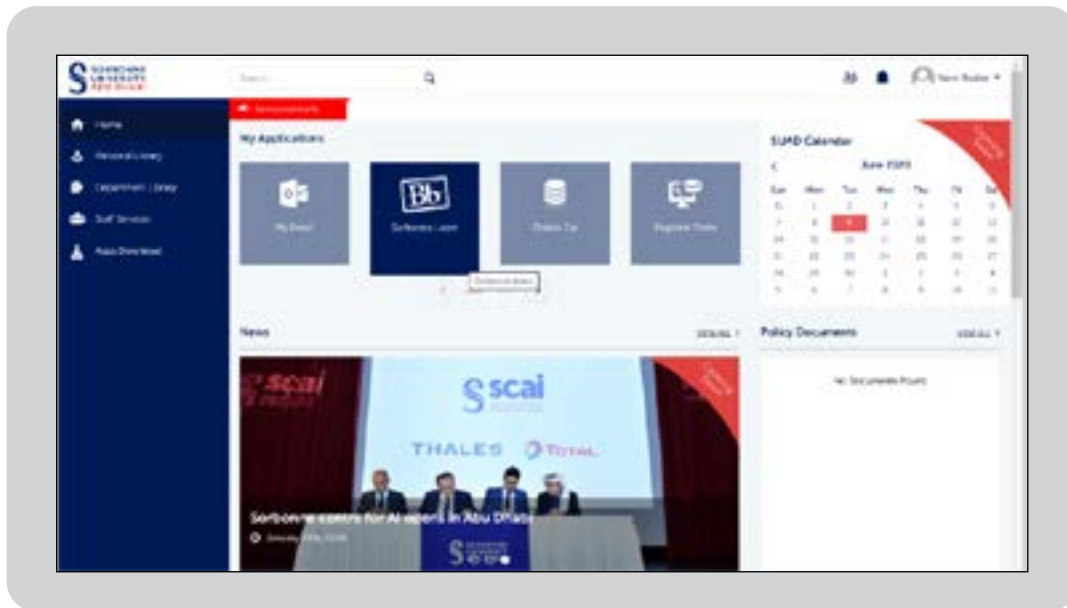

# Community services

## E-Space and Blackboard

From the e-space on the SUAD website, you will have access to your **student e-mail**, the **Sorbonne learn** (Blackboard) and the **Registrar Portal**.

<http://space.sorbonne.ae>

**Blackboard:** This educational platform is a key tool for each course in order to download all the course material assigned by the professors (documents, powerpoints, video links and so on). You will also have access to a shared forum titled **RM and Archival Science Students Community**. You will find useful and practical information shared by the professors, ISO resources and e-documents and you can communicate with the professors on assignment through this e-space.

**Registrar Portal:** Through this portal, you will get all the information related to your academic schedule and to your grades.

## Library Resources

As a premier resource centre the Library at SUAD provides access to over 100,000 books, 150 printed journals, 150,000 e-books and 32 electronic databases that enable the University to fulfil its mission of teaching, learning, research and the advancement of knowledge. Please, if you need to look for a specific book, click on the link below to have access to the catalogue, list of journals, databases and open access resources:

<https://www.sorbonne.ae/library/>

# Foundation year

For the students who do not meet the admission criteria to directly join the L1 and who did not attend a foundation year, the foundation year is mandatory before joining the programme. This is a demanding programme which requires a good level in English, in Arabic and some strong academic skills to attend the Bachelor in Records Management and Archival Science courses.

## 1. Admission criteria for the Foundation Year:

Students have to meet these requirements to join the foundation year:

- French Baccalaureate with a minimum final average of 10/20 or High School Diploma with a minimum 75% average (or equivalent)
- English Proficiency Exam: EmSAT – English - minimum score of 1100, 61 in iBT TOEFL or IELTS 5.0
- Arabic Proficiency: A minimum average of 70% in the Arabic Subject in the High School

## 2. Academic structure of the foundation year:

\* CA = Continuous Assessment

\* FA = Final Assessment

	Courses	Contact hours	Assessments	Staff
1 <sup>st</sup> semester	Advanced English course I	39hrs	CA* + FA*	Madalena Morais

	Introduction to Managing records and archives	20hrs	CA + FA	Dr Mehluli Mazuku
	Research Methodology	30hrs	CA + FA	Dr Mehluli Mazuku
		<b>202hrs</b>		

## Course descriptions

### Advanced English course I

This course covers the concepts and theories related to bringing the reading, writing, speaking, listening and grammar skills of non-native English speakers to an advanced level through a variety of interactive classroom activities.

### Methodology and understanding in English

This course covers the specific rules and structures of English grammar and their application in various contexts. The overall aim of the course is to both: improve grammatical accuracy across a range of simple and complex constructions; and to adapt these structures to the demands of various related tasks. The course includes a focus on integrating acquired grammatical skills into written and oral production.

### Advanced Arabic course I

Since the course is aimed at an audience of Arabic speakers, who need to improve their level especially in written and oral expression in standard Arabic (Fusha), the course will cover two main areas: the first is morphological and the second is syntactic. Depending on the level of learners, the first semester would be devoted to morphology, while the second will focus more on syntax. But the two areas can be approached simultaneously if the level allows.

Through authentic documents (written and oral) and role plays, this course will include study of the fundamental concepts in the Arabic linguistic system like the concept of derivation as well as the concept of I'rab or the three cases.

### French course I

Ce cours est une introduction à la langue française en tant que langue étrangère, pour des étudiants non-francophones. Le cours apporte les bases lexicales, grammaticales et phonétiques, ainsi que les actes langagiers primaires.

## Initiation IT course

This course tackles key concepts to get the C2i certification. Once achieved, students will acquire basic knowledge about software presentation, word processors and spreadsheets softwares (Word, Excel), Pwpt.

## Introduction to Managing records and archives

This course covers the practices related to managing records throughout lifecycle in all media in modern organisations. It includes the management of records and archives. Students will study paper and digital recordkeeping systems, record identification, classification and organisation, evaluation of records for sensitivity, security and retention values, appropriate disposal of records, the wider legal and societal framework in which records should be managed and the role of records managers and others in their management. The course includes a discussion of the nature and importance of records and archives both within organisations and to society in general.

## Research Methodology

This 30 hour course is conceived as a first introduction to research in humanities. The aim of the course in the first phase is to develop the student's autonomy towards sources : ability to identify them, then find them in the relevant database according to their format (printed, iconographic, digitalized), understand them using the proper material and conceptual tools, and retrieve relevant information as well as summarize the ideas and point of views or analytical angles expressed in them. They will be particularly trained in the correct use of internet sources and verification of information. In a second phase, the student will learn how to incorporate these sources following proper rules in research, on a in the realm of Arab and Middle-Eastern Studies assigned by the instructor. The students will be presented with the ethics of quotation in academic research, and the technicalities of using primary and secondary sources: in-text referencing, footnotes, endnotes. Basic rules of transliteration of Arabic will be taught and applied. In a third phase, students will learn about the outcomes of humanities studies and possible achievements in the filed of academic research. Sessions are 2 hours long, except for referencing rules and transliteration sessions, 2.5 hours.

## Course descriptions

### Advanced English course II

This course covers the concepts and theories related to bringing the reading, writing, speaking, listening and grammar skills of non-native English speakers to an advanced level through a variety of interactive classroom activities.

### Advanced Business English

This course covers the specific rules and structures of English grammar and their application in various business contexts. The overall aim of the course is twofold: to improve grammatical accuracy across a range of simple and complex constructions; and, to adapt these structures to the demands of various related oral and written tasks using contemporary business English. The course includes a focus on integrating acquired grammatical skills into written and oral production.

This course develops reading, writing, and vocabulary skills in the business context and is intended for high intermediate level students with an interest in using their language skills in business. It is designed to prepare students to use English in a future work environment. Students will develop English-language skills with a focus on business contexts, and they will learn vocabulary that is used regularly in the business world. This course will provide ongoing oral and written practice and enrich their communication skills by using English in specific business settings and situations.

## Advanced Arabic course II

As the first semester of this course, aimed at Arabic speakers, was mainly dedicated to morphology, the second semester will focus more on syntactic phenomena. Always through authentic documents, written and oral, this course will study the functions of names, the difference between the nominal sentence and the verbal sentence, the different forms of the nominal sentence, the comparison, the concept of the latent subject.

## French course II

Ce cours apporte des précisions grammaticales et aborde des sujets de la vie courante, des solutions pour faire face à des situations de découverte, de besoin, dans un environnement francophone.

## Introduction to Records Management IT tools

This course covers first, the theoretical concepts of electronic data management systems, their benefits and added value for companies and different organizations. In addition, the course will include workshops on how to practice these concepts with an electronic platform. It will include as well, the study of practical cases through different challenges and stakes, in terms of managing efficiently manual and electronic data.

## Professional workshop about perspectives of the RM and archiving

This workshop aims at providing a wide range of lectures coming from professionals to better explain the challenges that the archivists and records managers face nowadays. Different professionals will be invited to introduce, to share and to explain their experience in their field. Students will be informed about the different specificities of archives and records management and in the private and public institutions, at different scales. UAE private and public institutions, Regional Companies (Constellio, Gale Company) and International companies (ICA) will introduce the key stakes of records management and archiving in these areas. At the end, the goal is to get an overview about various aspects of the RM through the world at different scales and from different perspectives.

The report will be divided into two parts. The first one is a synthesis of the different conferences and the second part is the result of a short research about a topic related to the conference. Students have to follow the academic guidelines given in the research methodology course : short introduction and three paragraphs highlighting key points to deal with the topic.

## Artificial Intelligence and Emerging Technologies in Records Management

The course introduces students to the fundamental aspects of Artificial Intelligence (AI), blockchain technology and data-mining. Emphasis will be placed on conceptualizing artificial intelligence and how it really works. The course will focus on AI techniques and how these can be applied in records and archives management. Particular attention will be given to what AI can do for records managers and archivists. Issues to be covered will include the application of AI in automatic classification of content, automatic identification of key data and identification of value. The potential benefits and associated complexities of AI in records management will also be discussed. The course will also provide an overview of records management before and during the AI revolution. This will help students to appreciate the transition to managing information through AI.

Other essential aspects to be covered in the course include applications of blockchain technology in records and archives management. Focus will be on the use of blockchain technology for digital records authenticity, records retention and disposition as well as long term digital preservation of records. The course will also provide an overview of data-mining and offer discussions on data mining techniques, algorithms and how organizations can employ data mining technology to improve their records and archives management processes. Attention will be given to selected algorithms and techniques such as Classification, Clustering, Regression, Artificial Intelligence\*, Association Rules and Decision Trees amongst others.

## Geopolitics in the Middle-East

The course aims at providing greater understanding of the cultural and political structures that have shaped current realities and conflicts in the Middle East. It will focus first on the "making of the Middle East" and the interventionism of the Great powers at the beginning of the 20th century in order to understand what makes the region so susceptible to external intervention. It will provide also some case studies about contemporary conflicts in the region and focus on the importance of natural resources in the ME and the ongoing struggles to reshape Middle Eastern states.

# Programme structure

The programme is divided into four categories: **fundamental records management & archival courses**, **fundamental academic course**, **technical and professional trainings** and **general knowledge courses**.

## Fundamental Records Management & Archival courses

Fundamental courses offer an overview of archival legislations, archiving standards, management of current, semi-current and non-current archives, records keeping theory and management practices, technology involved in records management and information retrieval theory. It develops an understanding of the processes of information handling and use within UAE organisations, assists in acquiring the basic principles of records management and archival science, and explores their application to professional practices.

## Technical and professional training:

Beyond the fundamental archival courses, students will also get technical, digital and professional skills for administrative, business, and management purposes. Professors and professionals teach students to develop critical thinking and decision-making skills related to all forms of records to manage and preserve authentic and trustworthy records and archives, in the context of business, government, public needs, scientific research, or cultural heritage. A well-rounded experience will achieve this professional training due to **semestrial applied works** and a **long final internship** in a private or public companies in the UAE with the support of the National Archives.

Students have to apply what they learnt during each semester through these applied works organized with the professionals from the National Archives in Abu Dhabi. These 5 applied works introduce to the different duties and assignments that records managers and archivists have to fulfill, especially the use of specific IT tools, quantitative methods, statistics, administrative and legislative works. Their professional and technical skills will be evaluated with these applied works. Lastly, at the end of the BA, students will get an internship for 2 months at governmental or private institutions in coordination with the institutions interested in hiring some graduated students.

## Fundamental academic courses

Fundamental academic courses provide a deep knowledge in Law, History and Cultural Heritage in the Middle-East. The purpose of these courses is to provide students with a strong knowledge about History of the Middle East in a global context from the history of the Arab-Muslim World to the today's Middle-East. This historical background is important to better understand the archiving stakes through the ages and the importance to collect and store data securely. For the students who will work in public and private sectors, it is also important to have a wide range of Law skills, especially in the new scope of datamining application (cybersecurity, digital archiving, data protection, open date and so on).

## General knowledge courses:

As an option, students will have the opportunity to learn other foreign languages as Chinese, Spanish, Italian, German and French or to attend sports' classes. These courses will improve the linguistic skills of the students. Courses focused on communication skills in English and in Arabic are important for the students who will work in the UAE.

The curriculum follows the European ECTS system and the degree is awarded by Paris-Sorbonne University. The Bachelor in Records Management & Archival Science requires the successful completion of 180 ECTS comprising:

**Fundamental records management & archival courses** – 83 ECTS required

**Technical and Professional training** – 44 ECTS required

**Fundamental academic courses** – 35 ECTS required

**General knowledge courses** – 18 ECTS required

# Semestrial programmes

## 1<sup>st</sup> academic year

1 <sup>st</sup> semester			
UE	Course name	Dates	ECTS
UE1	<b>RMAS 101 - Introduction to archival science &amp; information sciences</b> Dr Victor Kabata	semestrial	6
	<b>RMAS 102 - UAE institutions – public and private entities</b> Hasan Abdulla Al Mesaabi	semestrial	6
	<b>RMAS 103 - Archival Diplomatics for electronic records management</b> Dr Forget Chaterera	semestrial	6

## Bachelor 1 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 101 – Introduction to archival science &amp; information sciences</b>
<b>Permanent Staff</b>	Dr Victor Kabata, SUAD Postdoc
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>The RMAS 101 introductory course, as the title mentions it, presents topical issues about current archiving. It provides to the beginners an overview about archiving during the full record life cycle. Then, the RMAS 106 about RM addresses the functions to process and to use data and documents since data creating and data capturing until the end of their activity.</p> <p>This course presents the basic knowledge of main concepts and theories of Archival science. It introduces first the Information sciences and their perimeter and highlights its relationship with both Archival science and Records management. The course will present then the nature, the characteristic and the typology of archives and related concepts such as data, information, document and record.</p> <p>The course includes the principals of Archival science and explains the major archival functions needed for rational and operational archival processing during the whole life cycle of archives. For each archival function, definitions, objectives, principals, processes, methods and tools will be explained and illustrated.</p> <p>The course will include the study of digital the nature and non-digital archives including their nature and differences. The course will draw the portrait of the national and international archival institutions and instances. Some relevant international illustrations and practical use cases will be presented.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>explain</b> the main axes of information sciences and its relationship with archival science</li> <li>2. <b>recognize</b> nature and perimeter of the archival science</li> <li>3. <b>distinguish</b> archival documents from other sources of information</li> <li>4. <b>use</b> properly archival terminology</li> <li>5. <b>understand</b> the archival principals and fundamentals</li> <li>6. <b>define</b> the archival functions and their implementation processes and tools</li> <li>7. <b>identify</b> the missions and roles of national and international archival instances and stockholders</li> </ol>
<b>Continuous assessment (50%)</b>	Mid-term examination Attendance and participation
<b>Final assessment (50%)</b>	Written examination

# Syllabi courses

## Bachelor 1 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 102 – UAE institutions – public and private entities</b>
<b>Local Professional</b>	Hasan Adulla Al Mesaabi – technical expert, UAE National Archives
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This course is an introduction to the principles, concepts, processes and systems used in records management and archival administration as they apply in practice within UAE institutions.</p> <p>Using these elements, students will explore real world issues and case studies. This course will start by an introduction about how does an administration work and create information and documents and keep archives. This will lead to a description of the panorama of different types of UAE institutions (public and private) and their history and organization. This will show the national administrative schema and its evolution through the main periods of the UAE history.</p> <p>Students will study and reflect on the practical, ethical and social issues regarding the creation, retention and disposal of records and archives. Evolutions of the digital innovations in the UAE companies and public institutions will be studied. The students have to be able to apply the processes of innovations and entrepreneurship from study cases. The course will include a study of the organization charts of each category and the common activities between them.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Recall</b> the UAE administration panorama and UAE history of the administration evolution</li> <li>2. <b>Describe</b> the Evolution of organization Charts</li> <li>3. <b>Explain</b> the new models of management implemented in UAE administration</li> <li>4. <b>Memorize</b> information about new technology applied to the management of UAE administration</li> <li>5. <b>Define</b> the UAE private administration environment</li> </ol>
<b>Continuous assessment (50%)</b>	<p>In class assignment (20%)  Attendance and participation (10%)  Mid-term examination (20%)</p>
<b>Final assessment (50%)</b>	Essay

## Bachelor 1 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE 1 – RMAS 103 – Archival Diplomatics for electronic records management</b>
<b>Permanent Staff</b>	Dr Forget CHATERERA, SUAD, Assistant Professor
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This course aims to explain the concepts of record from ancient times to 21st century, whatever the medium is. It refers to the impact of the medium for the creation of records, the relationship between medium and information, the differences between a draft, an original and a copy; the differences between a document, a record and an archive.</p> <p>The four characteristics of a record according to ISO standard for records management (ISO 15489, 2001, 2016) are explained: authenticity, reliability, integrity and usability, including the distinction between evidential value and informational value.</p> <p>The second part of the course is dedicated to "digital diplomatics", that is a strong methodology for archivists and records managers to analyse and describe born-digital records in terms of authenticity, reliability, accuracy, completeness and trustworthiness.</p> <p>A focus will be made on the "six categories of records" according the international research group InterPARES, and the impact of this categorisation on the way the records units are created and managed. The course ends with a presentation of the consequences of digital environment on the creation of information and records, and the definition of an electronic record according to some standards.</p> <p>The course includes the display of a set of pictures of documents, records and archives, in both paper and digital form. The students are invited to observe the pictures, to describe the different facets of a document (medium, lay out, date, signature, annotations...) and to compare some of them.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>describe</b> information in terms of medium, form and content</li> <li>2. <b>explain</b> the main concepts of archival diplomatics</li> <li>3. <b>name</b> the four requirements of a record</li> <li>4. <b>understand</b> the main changes for records management in the digital environment, in terms of appearance, arrangement and storage</li> <li>5. <b>list</b> the main standard defining what an electronic record is</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Quiz 1 (15%)          Quiz 2 (15%)          Oral Presentation (20%)</p>
<b>Final assessment (50%)</b>	Description of a record chosen in the student personal environment + quiz

# Syllabi courses

## Bachelor 1 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE2 – RMAS 104 – History of the Arab-Muslim World, from tribes to empire</b>
<b>Professor on Assignment</b>	Pr Dr Mathieu Tillier, Sorbonne University, Paris
<b>Dates</b>	13-25 November
<b>Course description</b>	<p>The seventh century witnessed the appearance of a large empire, stretching from the Atlantic Ocean to the shores of the Indus, carrying a new monotheistic religion, i.e. Islam. The succession of Prophet Muhammad, the discord that appeared between his Companions and the Muslim armies' conquests allowed the emergence of a new regime, the caliphate, guarantor of the unity of the new empire. At the head of the state, the caliph appeared to the majority of Muslims as the representative of an Islamic order decreed by God, different from previous or contemporary kingdoms. The caliph regarded himself as the deputy of God on earth and as the successor of the prophet Muhammad. Beyond the ideological particularities of this institution, the creation of the caliphate did not, however, represent a break with the government systems inherited from Late Antiquity. Moreover, the legitimacy of the first caliphal dynasties remained fragile and several groups and trends proposed alternatives to their authority.</p> <p>After studying "Arabian period" (632-661), i.e. the time of the foundation of an Islamic empire, the conquests and the establishment of the caliphate, this class will focus on the Umayyad century (661-750) during which the caliphate and its administration developed in Syria. The last stage of this journey through time will bring us to Baghdad, capital of a strong and centralized state, which eventually declined as it divided into several autonomous provinces.</p> <p>Through the analysis of a variety of sources (literary, epigraphic, numismatic, papyrological), this class will explore the functioning of the Umayyad and Abbasid caliphates, their ideologies, courses and institutions, and analyze the strategies of the main political and religious opposition movements (Sunnis, Shiites, Kharijites). This class will also include the study of original documents that will illustrate the administrative and archival practices under the Umayyad and Abbasid dynasties.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>understand</b> the main evolutions of Islamic history</li> <li>2. <b>assess</b> the impact of the emergence of Islam on the history of the Late Antique Near East</li> <li>3. <b>analyze</b> texts relating to the early days of Islam</li> <li>4. <b>develop</b> a historical analysis on political thought in the early centuries of Islam</li> <li>5. <b>understand</b> the bureaucratic functioning of the first Islamic empires</li> <li>6. <b>read</b> Arabic documents issued by the Umayyad and Abbasid administrations</li> </ol>
<b>Continuous assessment (50%)</b>	<p>In class assignment (15%)            In class presentation (15%)            Report / homework assignment</p>
<b>Final assessment (50%)</b>	<p>The student will have the choice between :</p> <ul style="list-style-type: none"> <li>• writing an essay about a topic examined in class</li> <li>• writing a commentary on a document read and explained in class</li> </ul>

# Syllabi courses

## Bachelor 1 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE2 – RMAS 105 – Introduction to Coding &amp; Programming</b>
<b>Local Professor</b>	Adel Yazid, Professional on assignment
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This mandatory IT course will be divided into two groups. 20 students maximum are allowed to attend this course together.</p> <p>This introduction course to coding and programing is related to the records management. It will offer, at the first semester, a basic study of the IT environment, language and coding and will give the students a valuable skill. This course aims at introducing the basic concepts of coding using a friendly and popular programming language: PYTHON. The course introduces first, the basics of coding, such as input and output instructions, data types, conditional statements and iterations. Then it covers some advanced structures like functions and modules, Tuples and sets, in addition to lists and dictionaries.</p> <p>A more advanced teaching including a reflexion about the IT tools used for RM will be delivered during the 3rd academic year (RMAS 211 – Digital Tools and Environments).</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Identify</b> various types of statistical variables and the typical representation tools employed to represent them</li> <li>2. <b>Determine</b> various measures of centrality, dispersion and concentration for quantitative variables</li> <li>3. Given two (typically qualitative) variables, <b>design</b> two-way contingency tables and determine measures of association and dependence</li> <li>4. <b>Carry out</b> regression analysis among two quantitative variables</li> <li>5. <b>Familiarize</b> with the statistical package SPSS and with its use in order to carry out the statistical analyses taught during the course</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Practical exercise 1 (20%) Practical exercise 2 (30%) Mid-term exam (50%)</p>
<b>Final assessment (50%)</b>	NA

# Syllabi courses

**Bachelor 1  
Semester 2**  
2021-2022

<b>Course code and title</b>	<b>UE1 - RMAS 106 - Records management program</b>
<b>Professor on Assignment</b>	Prof Dr Basma Makhoulouf, Information Sciences Dept. // Geneva School of Business Administration
<b>Dates</b>	15-27 January
<b>Course description</b>	<p>This course covers the concepts and theories related to records management (RM). Records management is the area of management that is responsible for effectively and systematically controlling the creation, receipt, maintenance, use and availability of documents, including the processes of entering information and evidence on business and transactions. Records management designs, implements and controls specific systems for the organization and management of records. The course presents the tools and methods necessary for the implementation of such systems in organizations. Some use cases will be presented and discussed in class.</p> <p>Contents about international standards in relation with this topics will be deepened in connection with the first course about the general introduction (1st semester), such as :</p> <ul style="list-style-type: none"> <li>• <b>ISO 15 489, 2001.</b> Information and documentation — Records management — Part 2: Guidelines. Geneva: ISO, 15th September 2001. ISO/IEC 15489</li> <li>• <b>ISO 15489, 2016.</b> Information and documentation — Records management — Part 1: Concepts and principles. 2nd ed. Geneva: ISO, ISO/IEC 15489-1</li> <li>• <b>ISDF</b> International Standard for Describing Functions. This standard provides guidance for preparing descriptions of functions of corporate bodies associated with the creation and maintenance of archives. Analysis of the functions of corporate bodies is important as the basis for many recordkeeping activities</li> <li>• <b>ISDIAH:</b> International Standard for Describing Institutions with Archival Holdings. This standard provides general rules for the standardisation of descriptions of institutions with archival holdings</li> </ul> <p>The course explores the new trends in records management approaches. It includes a conference on Records continuum that will be delivered by Dr Hassemi from Monash University</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ul style="list-style-type: none"> <li>• <b>recognize</b> the nature and perimeter of the records management</li> <li>• <b>identify</b> the advantages of a records management program</li> <li>• <b>analyze</b> the records management needs of an organization</li> <li>• <b>apply</b> a functional approach to records management</li> <li>• <b>appraise</b> a records management solution with a cost/benefit study</li> <li>• <b>analyze</b> the risks affecting an organization's records</li> <li>• <b>identify</b> the measures, the processes and the tools needed to protect corporate records</li> </ul>
<b>Continuous assessment (50%)</b>	<p>Mid-term examination (40%) Attendance and participation (10%)</p>
<b>Final assessment (50%)</b>	Final written exam

# Syllabi courses

## Bachelor 1 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 107 – Archival legislations – UAE archival laws and regulations</b>
<b>Professional on Assignment</b>	Hasan Adulla Al Mesaabi – Technical Expert, UAE National Archives
<b>Dates</b>	semestrial
<b>Course description</b>	<p>General introduction to archival legislation and its importance to manage and preserve all government documents and archives.</p> <p>The course will include an analytical reading of the UAE National Archives law number 7/2008 and the bylaws, showing the legislative foundation of the archival policies and procedures for records management, collecting, processing, preserving, and communicating historical archives. It will show the challenges in the implementation of these texts in the government administration in correlation with other regulations issued by national authorities.</p> <p>Based on international practices and benchmark in this field including the most important models throughout the world, this course will show how to design regulation texts in the field of records management and archives.</p> <p>The course will be reinforced by text readings and practical in-class exercises for writing internal regulations for documents and records management and archives.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ul style="list-style-type: none"> <li>• <b>Memorize</b> all the legislation and regulation texts related to records management and archives</li> <li>• <b>Recall</b> the most important models of the legislation and regulation texts related to records management and archives, throughout the world</li> <li>• <b>Explain</b> the content of each legislation text</li> <li>• <b>Define</b> the main concepts and terminology based on the legislation and regulation texts related to records management and archives</li> <li>• <b>Identify</b> the challenges and difficulties to implement the legislation and regulation texts related to records management and archives</li> <li>• <b>Write</b> internal regulations for records management and archives</li> </ul>
<b>Continuous assessment (50%)</b>	<p>In class presentation (20%)            Mi-term exam (20%)            Attendance and participation (10%)</p>
<b>Final assessment (50%)</b>	Essay

## Bachelor 1 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 108 – International cooperation, preservation standards &amp; ethics</b>
<b>Professional on Assignment</b>	Michel Cottin – Archivist, National Archives in Luxembourg
<b>Dates</b>	29 January-10 February
<b>Course description</b>	<p>The course covers the concepts and theories of the records management discipline, as it is a set of activities focused on improving the creation, validation, preservation, access, description and disposition of records, as products of an activity. The matter has been more and more a focus these last years, due to the progress of digitization and e-administration. As standardisation is the core ingredient to the harmonisation of professional practises, the course includes comparisons between national laws and regulation from various countries (USA, France, China, Australia, Sweden, Spain...) and the content of existing standards in the field of records management, that could enable students to forge a solid background by comparing different environments with an ethical and reflexive approach.</p> <p>The course will include an overview of the process of creating a standard, but will particularly focus on the content of existing standards and technical reports on the subjects. The lecturer proposes to soften the harsh side of the content of these texts by bringing up the essential notions with specific examples such as; who are the actors of a records management process? the roles and responsibilities? what kind of metadata should be chosen ?</p> <p>Those elements would be necessary to fulfill the basic knowledge about standards.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Identify</b> what is the core basis of the archival profession, from international standards and ethic behaviour</li> <li>2. <b>Discuss</b> (in the same way as lawyers do with laws) and outline the main aspects of professional standards and interpret them</li> <li>3. <b>Select</b>, identify, and use appropriate standards, or best practises based on their needs, projects and work context</li> <li>4. <b>Define</b> what is the base of ethics in archival profession, routine of standards development as well as international issues, lobbying and interests</li> <li>5. <b>Explain</b> and promote the role of each stakeholders in the constitution of reference literature corpus, professional practise and ethical behaviour</li> <li>6. <b>State</b> what are the core elements throughout the profession that constitutes archival and records management practise</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Quiz (25%) Teamwork oral presentation (25%)</p>
<b>Final assessment (50%)</b>	<p>Essay questions + MCQ</p>

## Bachelor 1 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE2 – RMAS 109 – Middle East in the Early Modern connected World</b>
<b>POA</b>	Dr Dejanirah COUTO, Associate Professor EPHE (Paris)
<b>Dates</b>	12-24 February
<b>Course description</b>	<p>This course introduces the main historiographical models used in current <b>historical discourses - global history, world history, connected history and micro-history</b> - by making use of <b>diplomatics</b> (critical analysis of historical documents) applied to early modern Middle East history (<b>sessions 1, 2</b>).</p> <p>More precisely, the course is methodologically designed to develop the student's knowledge, from session to session, on the practical use of diplomatics associated with <b>Middle East history</b>, a source of considerable amount of heterogeneous documentation. In order to show how the document-source concretely builds the historical discourse(s), a cluster of archival pieces related to early modern Middle-East History will be presented. These archival pieces will provide concrete examples for establishing the value of the <b>document</b> before undertaking appraisal (<b>session 3</b>).</p> <p>The process includes assessing the <b>authenticity</b> of the document (<b>session 4</b>), by providing <b>external evidence</b> (i.e. <b>historical context</b>) (<b>session 5</b>), and <b>internal evidence</b> (physical characteristics of the document and textual criticism) (<b>session 6</b>). Being a key moment of the historical writing, the <b>appraisal</b> (by making use of some documents) will be addressed in <b>session 7</b>. <b>Session 8</b> will explain how criteria in records management is an essential tool that supports the historian and the archivist's work. This session also presents <b>Digital History tools and technologies, text mining and close reading</b>, approaching <b>TEI (Tex Encoded Initiative)</b>, <b>GIS (Geographic Information System)</b>, and <b>Sketch Engine</b>.</p> <p><b>Session 9</b> provides some practical examples about how documents assembled using these softwares are exploited by historians, and also introduces <b>XML language</b> (to structure manuscript descriptions and archival documentation), <b>RDF (Resource Description Framework)</b> model and <b>LOD (Linked Open Data)</b> repositories. Taking into account the information provided in session 9, <b>session 10</b> introduces <b>Digital Libraries</b> and general <b>methodology</b> of their exploitation, providing examples such as Bibliothèques d'Orient, (BnF, 2016) a collaborative trilingual (French, Arab, English) resource on the Middle East and <b>DLME</b> (Digital Library of the Middle East).</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to develop clusters of competencies:</p> <ol style="list-style-type: none"> <li>1. <b>Explain</b> the specificities of concepts and theories shaping current historical discourses and how they correlate</li> <li>2. <b>Recognize</b> documents--sources and describe their relationship to Middle East connected history</li> <li>3. <b>Discuss</b> documents authenticity by identifying criteria for internal and external evidence in the framework of Middle East connected history</li> <li>4. <b>Express</b> the importance of the historical context in the appraisal of a document and give examples</li> <li>5. <b>List</b> documents-source to select for appraisal in a cluster of primary and secondary sources related to Middle East history</li> <li>6. <b>Name</b> tools in Digital Humanities selected in course [TEI, GIS, Sketch Engine, XML, RDF, and LOD] and <b>state</b> their use by archivists and historians, underlining how the latter employ them to enrich and to clarify historical discourse</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Oral presentation (20%) Case Study (10%) Essay questions (20%)</p>
<b>Final assessment (50%)</b>	Essay

# Syllabi courses

## Bachelor 1 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE2 – RMAS 110 – Quantitative Methods</b>
<b>Professor on Assignment</b>	Dr Morgan Kilzmann, Sorbonne University
<b>Dates</b>	5-17 March
<b>Course description</b>	<p>This course covers the fundamental concepts and tools of statistics needed to generate, explore and interpret databases. The sessions will be divided in two parts. The first part of the course includes the statistical tools required to analyze databases. We thus introduce the indicators which are important to describe a sample - measures of central tendency and dispersion- regarding the different forms of data (quantitative or qualitative variables) found in a database. Then, we will present statistical inference and statistical tests in order to generalize results obtained from a sample to the entire population (confidence interval, analysis of variance, Chi-square test).</p> <p>During the sessions, the students will use Excel for the different exercises. They will use the different part of the course in order to analyze a database and in order to write an oral presentation based on their analysis This course does not require a previous knowledge in statistics.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Recall</b> the fundamental concepts of statistics</li> <li>2. <b>Relate</b> the principles of statistical reasoning in Social Sciences</li> <li>3. <b>Describe</b> datasets and variables from Social sciences surveys</li> <li>4. <b>Explain</b> and communicate results</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Mid-term quiz (25%) Teamwork report (15%) Oral presentation (10%)</p>
<b>Final exam (50%)</b>	Final quiz

## Bachelor 1 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE3 – RMAS 111 - Legislative text, standards analysis and comparison</b>
<b>Professional</b>	Dr Forget Chaterera & Dr Victor Kabata, permanent staff
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This course aims to introduce students to the laws, legal texts, directives, regulations concerning the management of records and documents in the United Arab Emirates.</p> <p>The examination of UAE legal texts will be carried out in light of international standards governing the management of records and documents. Following the introduction to the UAE legal texts, students will compare UAE texts to international standards. Students will analysis legal tests and international standards and shed light on the similarities and differences between them. The course will be held in the National Archives as a fieldwork.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Compare</b> UAE laws concerning records and archives to international standards</li> <li>2. <b>List</b> the legal requirements from organizations to achieve compliance with the archives law</li> <li>3. <b>Become</b> aware of the importance of compliance with rules and regulations</li> <li>4. <b>Understand</b> the difference between legal requirements and international standards</li> <li>5. <b>Carry out</b> case studies where an archive is evaluated in light of the law and international standards</li> </ol>
<b>Continuous assessment (100%)</b>	<p>Case study on the ground (90%) Attendance and participation (10%)</p>

## Bachelor 2 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE 1 - RMAS 201 - Appraisal and collection</b>
<b>Professional on Assignment</b>	Anne-Julie COSTE – Sénat (Paris)
<b>Dates</b>	4-16 September
<b>Course description</b>	<p>The operations of appraisal and collection are two main steps of digital and physical documents management. As a member of an organization, an archivist has to collaborate with employees or clients and make them aware of the internal needs and of legal requirements, to define the scope of a process of records' acquisition, inside and outside the entity he belongs, and to foresee which archives should be preserved on the long run. The task of records manager is to define the lifecycle of a document from its creation to its destruction or storage. Any kind of document has to be part of this process, whatever could be the moment of its creation, its form and support, in a world in which records are ever changing.</p> <p>The student will be taught how to design and operate in a systematic and critical way a records management policy for creation, communication, conservation and destruction of documents in both public bodies and private companies, that is:</p> <ul style="list-style-type: none"> <li>• Knowledge and comparison of different evaluation theories</li> <li>• Analysis and deseign of the document flow</li> <li>• Determination and implementation of evaluation criteria for digital and paper documents</li> <li>• Adaptation to the requirements and needs of the departments</li> <li>• Development of appraisal and collection tools (retention schedule...) and communication about them</li> <li>• Choice an evaluation process of storage technologies and tools</li> </ul> <p>The softwares recommended are the Microsoft office suit and Visio.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Operate</b> a Records Management Policy discussing creation, communication, conservation and destruction of documents</li> <li>2. <b>Analyze</b> the documents flow</li> <li>3. <b>Examine</b> the archival appraisal (its goal, its criteria, its process)</li> <li>4. <b>Test</b> archival tools used in records management</li> <li>5. <b>Distinguish</b> the data value from their creation</li> <li>6. <b>Experiment</b> the archivist job as a service provider</li> </ol>
<b>Continuous assessment (50%)</b>	<p><b>Multiple choice questions</b> (x5) (20%)</p> <p><b>Work group</b> (25%)</p> <p><b>Participation</b> (5%)</p>
<b>Final exam (50%)</b>	Case Study

## Bachelor 2 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE 1 – RMAS 202 – Information Governance in a Big Data World</b>
<b>Professor on Assignment</b>	Lionel HUSSON, Assistant Professor – La Rochelle University
<b>Dates</b>	18-29 October
<b>Course description</b>	<p>The main purpose of this course is to cover the concepts and theories related to information governance. In the new context of the information age, there is a need to define the quality and effectiveness of information and records management and to connect it to the business activities. Managing information is an asset but means applying strategic decisions, organizational choices, risk evaluation, security protection and implementation of appropriate tools.</p> <p>This course provides an overview and models to understand information governance in various organizations, and also the different role and actors, processes, rights and values related to this field, mainly based on information production and exchanges. A global study of the many requirements for the implementation of an information governance policy is essential for future records managers and archivists.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Evaluate</b> information governance upon its strategic, business and legal value</li> <li>2. <b>Appraise and implement</b> information governance policies</li> <li>3. <b>Analyze</b> information security standards and procedures</li> <li>4. <b>Organize</b> the information governance and its structure in their organization</li> <li>5. <b>Implement</b> information governance principles</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Q&amp;A. In class assignment 1 (15%)            Q&amp;A. In class assignment 2 (15%)            Short analysis (20%)</p>
<b>Final exam (50%)</b>	In class preparation and oral presentation

## Bachelor 2 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 203 – Archives, data and digital or physical records description : methodology and use cases</b>
<b>Professional on Assignment</b>	Anne-Burnel – La Poste Archives Director (Paris)
<b>Dates</b>	16-28 October
<b>Course description</b>	<p>This course is directed to the methodology and tools related to description of archives and records, particularly in a digital environment. Firstly, it covers the physical archive finding aids in accordance with the description frameworks and how to make available online descriptions for aiming interoperability between archives institutions. Secondly, the course deals with digital or physical records and data description and is part of business processes dematerialization. Its goal is to bring theoretical knowledge to students but also introduce them to the professional practice.</p> <p>The course is to allow students to discover traditional finding aids and record indexing tools, then to analyze the difference between them in relation with their own nature and purpose. Upon completion of the course, students can not only create and use the main types of archive finding aids based on standardized description framework (<b>ISAD (G)</b> - General International Standard Archival Description – <b>ISAAR (CPF)</b> - International Standard Archival Authority Record for Corporate Bodies, Persons and Families, <b>ISDIAH</b> - International Standard for Describing Institutions with Archival Holdings. ...) but also identify relevant metadata and design classification schemes, metadata schemas, databases etc. for records description. A specific attention will be given to the development of <b>RIC-CM</b> (Records in Contexts – Conceptual Model) and of <b>RIC-O</b> (Records in Contexts – Ontology). An introduction to EAD and EAC related to the Metadata Standards for Archival Control will be tackled, especially the structure and use of the Encoded Archival Description (<b>EAD</b>) and Encoded Archival Context (<b>EAC</b>) metadata standards.</p> <p>They will be able to appraise needs for using archives (for purposes of historical research) vs managing and indexing records (for purposes of business). The course is aimed at ensuring that students relate data and document management to well-suited description methodology and tools and differentiate them from finding aids. Through a step-by-step approach, it enables them to produce physical and online finding aids for archive institutions and respond to needs of record-producing organizations by constructing appropriate solutions for keeping and retrieving efficiently relevant information and reliable evidence.</p> <p>The pedagogy is based on teamwork and interactive sessions between students and teacher applied to classroom exercises, workshops and case studies. Demonstration and using of a description software (Ica-Atom) and of an electronic record-</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Distinguish</b> needs of information and evidence expressed by record-producing bodies and <b>appraise</b> secondary value of archives for research, heritage and memory related to description methodology of both</li> <li>2. <b>Construct</b> archive description in accordance to standardised frameworks</li> <li>3. <b>Operate</b> a description software</li> <li>4. <b>Practice</b> naming, indexing and classifying records with relevant metadata which they have identified and selected</li> <li>5. <b>Compare</b> archives description with searching for records tools and <b>analyze</b> difference between description software and search functionality of an electronic record-keeping system</li> </ol>
<b>Continuous assessment (50%)</b>	<p>In class assignment (20%)            In class quiz (10%)            Homework (20%)</p>
<b>Final exam (50%)</b>	Essay from a concrete case of a business process

## Bachelor 2 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE 1 – RMAS 204 - Classification</b>
<b>Professor on Assignment</b>	Dr Mehluli MASUKU, SUAD Postdoc
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This course covers the concepts and theories related to records management and classification, including an overview of methods and an analysis of the information governance system:</p> <ul style="list-style-type: none"> <li>• A new definition of archives and records and their associated metadata</li> <li>• The birth of the information ecosystem inside organizations and its metadata</li> <li>• Tools required to analyze these ecosystems and to classify (functional analysis and records classification)</li> </ul> <p>The course includes a discussion about the evolution of archival classification due to the digital transition and the way it changes how information is produced, even if we are still living in a hybrid world, where both paper and digital are used:</p> <ul style="list-style-type: none"> <li>• Function-based approach, top-down approach, bottom-up analysis and transactional analysis</li> <li>• Digitizing processes and their consequences</li> <li>• Born-digital information versus digitisation collections: their impact on metadata and access</li> </ul> <p>The course will include a study of records management and digital archiving standards, their implementation, and their evolution due to new technologies such as AI and Big data:</p> <ul style="list-style-type: none"> <li>• How to use international standards? (Pro and cons)</li> <li>• Creating of our own standards for our organization</li> </ul>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Use</b> international standards in records management and digital archiving and classification</li> <li>2. <b>Sketch</b> an analysis of a digital information ecosystem by constructing records management tools and risk management analysis</li> <li>3. <b>Interpret</b> the information risks and react to managers confronted to an information problem by finding adapted solutions</li> <li>4. <b>Choose</b> the actions to implement an adapted records management policy for the organisation</li> <li>5. <b>Appraise</b> the need of a good records management system and of an adapted classification policy</li> <li>6. <b>Experiment</b> tests of archiving (construct a proof of concept; quantify the results to launch projects) with an adapted classification to different organisations (public and private organisations)</li> </ol>
<b>Continuous assessment (50%)</b>	In class assignment (20%) In class quizz (10%) Homework (20%)
<b>Final exam (50%)</b>	Essay

## Bachelor 2 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE 2 – RMAS 205 - Modern Middle East</b>
<b>Professor on Assignment</b>	Dr Guillemette CROUZET – University of Warwick
<b>Dates</b>	13-25 November
<b>Course description</b>	<p>This course is an introductory survey of the modern history of the Middle East prior to the establishment of nation-states. It outlines the factors that have shaped the political, economic and social features of the modern Middle East from 1798 to the end of the First World War.</p> <p>Its geographic scope encompasses the central as well as the non-European territories of the former Ottoman Empire (Turkey, Iraq, Syria, Palestine, Egypt, Arabia) but also the Arabian Gulf and Qadjar Empire. The course comprises a brief background to the history of the region and follows with the long nineteenth century through the dissolution of the Ottoman Empire. Focusing on key concepts such as "Age of Revolution", "reforms" and "imperialism", it sheds lights on the connections between the Middle East and different political, geographic and economic spaces: the Indian Ocean, the Empire of the Raj, Central Asia and the Mediterranean.</p> <p>This connected history of the Middle East questions the very concept of the Middle East, its history and the geographical boundaries of this space of current geopolitical importance. The course also highlights the globalization of the Middle East during the long nineteenth century. The course treats several themes, including society and economy, central government reform, the emergence of new forms of identity and other challenges to the Ottoman order, and the entry of both informal and direct European colonial rule into the region</p> <p>The striking growth of European economic, political, and cultural influence in the region and the encounters with local political entities and societies will constitute the focus of the course.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Demonstrate</b> an understanding of the key concepts, main themes and approaches in Middle East history</li> <li>2. <b>Criticize</b> the notions of "modernity", "globalization", "Revolution"</li> <li>3. <b>Evaluate</b> critically a range of secondary and primary sources through readings and discussions</li> <li>4. <b>Experiment</b> written and oral presentation skills through individual and group presentations and assessments in class</li> <li>5. <b>Employ</b> a range of textual and visual sources through a multi-disciplinary lens</li> <li>6. <b>Interpret</b> primary and secondary source material and communicating ideas both orally and in writing</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Questions from an article and discussion (20%)            Oral presentation (15%)            Teamwork (15%)</p>
<b>Final exam (50%)</b>	<b>Essay questions and primary source analysis</b>

## Bachelor 2 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE3 – RMAS 206 – Applied work II – Archiving procedures : practical aspects</b>
<b>Professor on Assignment</b>	Dr Victor Kabata & Dr Mehluli Masuku
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>In records management and archiving, it is very important to deal with appropriate procedures showing how technical operations are performed and sustained by proper methodology tools and forms. This course will present in depth the most important procedures applied to identify records and archives, transfer those with historical values and dispose of non-valuable ones.</p> <p>All templates and forms will be analyzed and explained in the proper operational context showing how they are mapping the process needs which will lead to understand how they have been designed and how they will be used.</p> <p>The course will be delivered through interactive sessions allowing the students observe and analyze and study existing templates and forms in the National Archives bylaws and mandatory to all government institutions in the UAE. Also exercises of comparing similar best practices with other countries.</p> <p>The goals of these applied works is to learn how to design and fill the templates and forms about transfer, disposition and inventory, in support to the official procedures. Also to learn how to use these templates and how to avoid the errors.</p> <p>These applied works will be held at The National Archives premises and Students will be supervised and oriented by National Archives specialists and monitored by the representatives of Sorbonne University.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Identify</b> and <b>analyze</b> all existing forms and templates</li> <li>2. <b>Compare</b> with other practices best practices</li> <li>3. <b>Employ</b> all the necessary templates used in the administrations and The National Archives</li> <li>4. <b>Demonstrate</b> the ability in identifying process needs in terms of forms and templates used by the government institutions</li> <li>5. <b>Use</b> real templates and forms, fill them out and <b>examine</b> possible errors</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Study and analysis of templates and forms (30%)</p> <p>Exercise on design and usage of template and form (70%)</p>
<b>Final exam (50%)</b>	NA

**Bachelor 2  
Semester 2**  
2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 207 – Digital Preservation</b>
<b>Professor on Assignment</b>	Dr Corinne ROGERS, British Columbia University (Canada)
<b>Dates</b>	29 January-10 February
<b>Course description</b>	This course covers the concepts and theories related to the management and preservation of digital records by the creating organization/individual and its legitimate successor, such as an archival programme or institution. The course will introduce students to the major literature in the field and include study of international standards guiding digital preservation. Among other important standards and common practices, the course will cover in detail the Open Archival Information System (OAIS) reference model, PREMIS metadata standard for digital preservation, PRONOM format registry, and two open source tools that are increasingly being used around the world for digital preservation processing and access to archival descriptions, Archivematica and Access to Memory (AtoM).
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>demonstrate</b> an in-depth appreciation of the challenges presented to both records creators and records preservers by the adoption of digital technology for records creation, maintenance and preservation</li> <li>2. <b>document and address</b> such challenges through proper planning and strategizing</li> <li>3. <b>choose</b>, among a variety of recommended and/or implemented methods for ensuring the preservation of digital records, the most appropriate for a specific institution or body of records</li> <li>4. <b>demonstrate</b> familiarity with recent and current research on the preservation of digital records as well as the entire body of relevant literature</li> <li>5. <b>interpret</b> new and unforeseen digital records issues from a solid knowledge of concepts and principles</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Essay questions on assigned readings (25%)            In class presentation (25%)            Mid-term examination (20%)</p>
<b>Final paper (30%)</b>	Final paper (30%)

## Bachelor 2 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 208 – Principles and methods for the physical preservation of archival documents</b>
<b>Professional on Assignment</b>	Marie Courselaud – National Archives (Paris)
<b>Dates</b>	15-27 January
<b>Course description</b>	<p>This course covers the concepts and theories related to preventive conservation. Preservation and protection of the written heritage is essential for its transmission to the future generations. This discipline which appeared in the 1970s-1980s, aims to prevent the risk of deterioration of documents or to limit their impact, by creating optimal conservation conditions compatible with their current use. It places its approach at the level of the collections and no longer the individual object and also involves all actors of the institution.</p> <p>Unlike restoration, all measures and actions implemented are indirect. They don't interfere with the materials and structures of documents. They don't change their appearance.</p> <p>Preventive conservation takes into account physics and chemical agents of deterioration but also human behavior.</p> <p>The course will develop:</p> <ul style="list-style-type: none"> <li>• Precautions and the appropriate actions to be taken when handling, transporting, packaging, storing and exhibiting works</li> <li>• Collections management and organization (Planification, Integrated risk management, etc.). The course will develop assessment and self-diagnosis tools useful for planning</li> <li>• Monitoring environmental conditions: temperature, humidity, light, pollution and biological agents such as rodents, insects and mould</li> <li>• Disaster prevention (flood, fire, etc.) and safeguarding of collections as appropriate</li> </ul> <p>The course will be organised between lectures and group work on different topics. Concrete applications will be valorised as far as possible to enable students to have practical skills applicable in a professional field. In order to allow students to experiment with theoretical knowledge, a practical application of the courses will be organized in collaboration with the National Archives.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Apprehend</b> the boundaries of different conservation areas: preventive conservation/curative conservation/restoration</li> <li>2. <b>Organise</b> the conservation policy of its establishment (conservation plan, integrated risk management)</li> <li>3. <b>Differentiate</b> basic concepts of conservation-preventive and know how to act/react (climate management, packaging, space and collections maintenance, etc.)</li> <li>4. <b>Manage</b> mass treatment (conduct assessment at the site, prepare for a move, disinfection treatment, etc.)</li> <li>5. <b>Implement</b> preventive and corrective measures to address the various risks analyzed; implement an emergency plan</li> <li>6. <b>Organize</b> an emergency event (internal organization, first steps on documents, etc.)</li> </ol>
<b>Continuous assessment (50%)</b>	<p>In class assignment x 2 (20%) In classe presentation x 3 (30%)</p>
<b>Final exam (50%)</b>	Essay

## Bachelor 2 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE2 – RMAS 210 – Contemporary Middle East</b>
<b>Professor on Assignment</b>	Anne Claire Gayffier de Bonneville, INALCO, Paris
<b>Dates</b>	5-17 March
<b>Course description</b>	<p>The course aims to present an overview of the Middle East contemporary History through thematic studies. Based on a multidisciplinary approach, the course wants to report on the historical events and on their articulations. It seeks to make clearer the main dynamics and trends in the Middle East since the end of the First World War and to identify the historical fractures in this area. To truly understand the History of the zone, the course places the Middle East in a wider context, like imperialism or Cold War. At the same time the course focuses on more specific examples, with the analysis of different countries' history. This course covers the concepts and theories related to international relations, political science, social analysis. The course includes a discussion of political, economic and social evolutions in the Middle East. It will also include study of the regional challenges.</p> <p>The course includes a part of conferences that provide the basis (events, main dynamics, main actors...). It also puts students in contact with historical materials (texts, maps, museum collections, etc.) to enable them to examine the documents, question them, analyze them and debate on the motivations of international actors</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Distinguish</b> the historical context of an event</li> <li>2. <b>Question</b> the causes of some historical events</li> <li>3. <b>Differentiate</b> the main dynamics and trends in the Middle East since 1918</li> <li>4. <b>Debate on</b> the motivations of actors</li> <li>5. <b>Analyse</b> the key points in an historical text or a document</li> <li>6. <b>Use</b> the knowledge and concepts acquired into an essay</li> </ol>
<b>Continuous assessment (50%)</b>	<p>In class assignment (20%)            In class presentation (10%)            Report / homework assignment (20%)</p>
<b>Final exam (50%)</b>	Essay questions

# Syllabi courses

## Bachelor 2 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE2 – RMAS 211 – Digital Tools and Environment in the era of Artificial Intelligence</b>
<b>Professor on Assignment</b>	Dr James LOWRY, Liverpool University
<b>Dates</b>	17-28 January
<b>Course description</b>	<p>The Digital Tools and Environments course builds on digital records and archives management knowledge gained in previous semesters. It is an advanced course covering the concepts of the information society and the role of records and archives in such societies.</p> <p>Digital Tools and Environments is an applied course, giving students the opportunity to experience the identification, selection and application of digital tools to real world information management problems. The course includes the study of digital records as constituted in digital networks and physical infrastructures, the identification and characterisation of digital records through file profiling, the extraction and management of metadata for information management purposes, the analysis of systems for making and preserving records, including emerging systems such as distributed ledger technology (blockchain) and widely used platforms such as social media applications.</p> <p>The course will introduce students to working in web, cloud and big data environments and it will allow them to experiment with tools for utilising these environments for records and archives management purposes, including tools developed for data visualisation, digital forensics and digital humanities. Students will gain or further develop a range of academic skills, including critical thinking in relation to the social, legal and cultural uses of digital information, analytical skills through the examination of digital objects, and problem solving skills through the identification of digital curation problems and the review and selection of appropriate tools and methods for their solution.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Examine</b> digital records in diverse formats</li> <li>2. <b>Experiment</b> with systems for record-making and record-keeping as the basis for planning for digital preservation, use and re-use</li> <li>3. <b>Choose</b> and use tools for managing and exploiting digital objects</li> <li>4. <b>Use</b> their new skills and knowledge in combination with digital skills and knowledge from previous courses to plan holistic digital preservation strategies</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Infographic (30%)            Online Exhibition (30%)            Low Cost Digital Preservation Strategies (30%)            Participation (10%)</p>
<b>Final exam (50%)</b>	<b>Research Paper Essay</b>

## Bachelor 2 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE3 - RMAS 212 – Applied work III – Digitising and microfilming documents and archives</b>
<b>Permanent staff</b>	Dr Forget Chaterera, Dr Mehluli Masuku
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>Electronic Archiving represents the new era of the records and archives management profession, since decades many technologies and software have been developed and are used at very large scale throughout the world and in the UAE. It provides big advantage to the management of modern administration and gives large opportunities for content storage, management, search and ease of access.</p> <p>In this context, the applied work intended to provide knowledge about how to deal with scenarios related to assessment planning for digitizing historical documents and determine the timeframe resources and risk management. This applied work will also give students the knowledge of the usage of the different scanners which are used, different technics for setting up the scanners for scanning different types of materials based on the National Archives digitizing guidelines and standards.</p> <p>The content will be oriented to practical activities related to planning, organizing the processes of the preparation of documents for digitizing and microfilming, performing the procedure from capturing, data entry to quality control and release for preservation. Students will also observe and manipulate different formats of electronic archives and learn how to use the electronic archiving system and try to find out the issues and challenges based on the knowledge they acquired during the theatrical course.</p> <p>These applied works will be held at National Archives premises and Students will be supervised and oriented by National Archives specialists and monitored by the representatives of Sorbonne University.</p>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Set up</b> the methodology for digitizing and microfilming historical archives</li> <li>2. <b>Plan</b> for projects of digitising and microfilming historical archives and allocating resources based on the case study</li> <li>3. <b>Appraise</b> the appropriate archives to be digitised</li> <li>4. <b>Apply</b> standards to plan, manage and execute digitising projects</li> <li>5. <b>Use</b> efficiently electronic archiving systems</li> </ol>
<b>Continuous assessment (50%)</b>	Case Study (Practical digitizing task) (70%) Short presentations (share the knowledge) and assessment (30%)
<b>Final exam (50%)</b>

## Bachelor 3 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE1 – RMAS 301 - Daily operations of Archival departments and buildings</b>
<b>Professor on Assignment</b>	Julie Deslondes, PrOA, Director of Archives in France
<b>Dates</b>	6-18 November
<b>Course description</b>	<p>This course covers the concepts and theories related to the management of Archival departments and buildings and will include:</p> <ul style="list-style-type: none"> <li>• An introduction to the archival activities on a daily basis, including an analysis of prior or secondary activities, depending on the context of management. If some activities seem compulsory, some can be more or less important regarding in a specific context and it is crucial to identify and evaluate each situation</li> <li>• A survey of the different services and facilities needed in an archival building and the way they must interact. It will give a description of some key examples in the world and include a discussion about the different strategies and priorities of an archival administration regarding to its building situation</li> <li>• The specifications of archival buildings and equipment will also be examined: the needs regarding to climate and specific geographical risks, the anticipation of storage needs</li> <li>• The IT tools used to manage archival buildings and storage, and the maintenance issues will be presented and analyzed</li> <li>• The daily management of teams and the way the administration must meet user's demand will also be examined, including the consequence for the infrastructure, as workspaces, technical laboratories, the development induced by technologies and digitalization</li> <li>• As an operationally-focused course, it will provide real-word examples as a main way to fuel understanding to students. These examples can be given through websites, professional articles</li> <li>• In the end, the course has a practical extension: it includes a visit to the National Archives and is accompanied by visits in the various public and private organizations during semester 5 (Module n. 4)</li> </ul>
<b>Course learning outcomes</b>	<p>Upon completion of this course, students will demonstrate their ability to:</p> <ol style="list-style-type: none"> <li>1. <b>Manage</b> the activities of an archival administration and their priority</li> <li>2. <b>Design</b> the specific requirements of Archival departments and buildings</li> <li>3. <b>Appraise</b> different strategies regarding the conception and management of Archival departments</li> <li>4. <b>Compare</b> the requirements of daily management of Archival institutions, depending on the context</li> <li>5. <b>Estimate</b> the developments induced by technologies in archival departments and buildings</li> <li>6. <b>Evaluate</b> the situation of an Archival repository during the visits proposed to them</li> </ol>
<b>Continuous assessment (50%)</b>	In class assignment (30%); Oral presentation (30%); Report (40%)
<b>Final exam (50%)</b>	Written final exam

<b>Course code and title</b>	<b>UE3 - RMAS 311 - Business Records Management &amp; Technologies</b>
<b>Professor on Assignment</b>	Aurélien Conraux
<b>Dates</b>	23 October - 4 November
<b>Course description</b>	<p>Private organizations Archives services, or Information Management units within non-public entities, have a slightly different focus than public archives: information serves mostly utilitarian purposes and risk management. To better emphasize these particular uses, this course will focus on a series of particularities and assume students are familiar with "Heritage" information management and public archives' vocabulary and concepts. The course will build upon those to focus on:</p> <ul style="list-style-type: none"> <li>• Different types of companies (Mintzberg), internal culture with regards to information management. Relationships between Group and Subsidiaries, Business Units, Zone/Area entities Branches</li> <li>• Information governance experts: position(s) in organizational charts, denomination and mission(s)</li> <li>• The information management network: Information experts, IT, Legal, Business Owners, Providers and Consultants</li> <li>• Usual categories of business records and specific risk exposure associated with extended retention or early deletion: Group statutory information (core legal records), Finances, Mergers &amp; Acquisition, HR, Research &amp; Development, Marketing, Client Relationship</li> <li>• Regulatory constraints: impacts on data &amp; documents retention, Risk Management: International/local legislation, Personal Data Management (GDPR and equivalent legislations), Cloud act, E-discovery &amp; holds, lost information, over preservation</li> <li>• Technical trends and perspective: the surge of metadata and business objects information rather than document-based file systems, categories of storage &amp; repositories, migration towards cloud-based information storage and content services platforms. Main migration options: continuous flows or "shift &amp; lift"</li> <li>• Location of data in a global world: why it is important? Location of main repository, location of backup and replication datacenters</li> <li>• Main deliverables of a Business records Management project: retention categories and schedule, data mapping, use cases and information management models</li> <li>• Class interactions and exercises may include discussions on how much Business Records Management is linked to Change Management, Project Management, Negotiation and Project Team Management. Cross-fertilization from those disciplines and Audit will be promoted to expand the students' interest beyond strict technical know-how</li> </ul>
<b>Course learning outcomes</b>	<ul style="list-style-type: none"> <li>• <b>CLO 1: Interpret</b> priorities and strategic needs for records managers in the context of private entities</li> <li>• <b>CLO 2: Examine</b> Business records in context (local / international, depending on the company's range of products/ services)</li> <li>• <b>CLO 3: Question</b> Risk exposure stemming from erroneous Information Management policy</li> <li>• <b>CLO 4: Demonstrate</b> the internal logic of deliverables (retention schedules, email policies...)</li> <li>• <b>CLO 5: Operate</b> advanced projects and sustainable policies within an organization with other experts</li> <li>• <b>CLO 6: Use and appraise</b> Analytical and Information gathering tools and methods such as organizational analysis, business process analysis, risk management plan, SWOTs, registries of digital repositories...</li> </ul>
<b>Continuous assessment (50%)</b>	In class assignment (30%); In class role play (30%); in class presentation (40%)
<b>Final exam (50%)</b>	Written exam

## Bachelor 3 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE2 - RMAS 303 - Digital Archives Law</b>
<b>Professor on Assignment</b>	Dr Sarah Markiewicz, University of Poitiers, France
<b>Dates</b>	18-30 September
<b>Course description</b>	<p>This course covers the concepts and theories in Law and in Archival Science regarding the digital environment. The course includes a discussion of interdisciplinarity between Law and Archival Science but also into each academic area, the confrontation of their own traditional principles to the digital environment. The course will include study of different bodies / branches of Law such as : Contracts Law and its legal formalism (traditional and on line issues), Personal Data Protection Law (mainly on line issues), Open Data Law (mainly on line issues and in the public sector), Cybersecurity legal-normative framework and its link with documents or archives, Information Technology Contracts Law and its impact on documents or archives through specific provisions, Archives Law (traditional and on line issues), Evidence Law (traditional and on line issues), Intellectual Property Law (traditional and on line issues). Even it is a Law course, it will make connection with relevant technical standards when it is useful. Each of the 10 morning sessions will consist of 3-hour lecture (except on Fridays: just 1.5-hour lecture) and before or after 1-hour tutorial per morning session. On the 11 hours dedicated to tutorials, 2 hours will focus on how to acquire the relevant methodology to apply for the 2 mock examinations (a 1,5-hour examination on Friday morning, each week) and the final examination in January. The 9 other hours will be used to check students' knowledge acquisition, after each session, during the first hour of the next day session.</p>
<b>Course learning outcomes</b>	<ol style="list-style-type: none"> <li>1. Judge differences between paper documents and e-documents and their practical managements and legal regimes, respectively</li> <li>2. Assemble legal requirements / needs / precepts and archival science requirements / needs / precepts in a digital environment</li> <li>3. Propose an interdisciplinary approach (law / archival science) face to a technical-legal issue in the digital world</li> <li>4. Apply this content course in a public or private sector work position, and not just the public sector side of archives</li> <li>5. Argue with a lawyer, based on his/her legal concepts or references and make him/her understand / be sensitive to your archival science needs : promoting interdisciplinary dialogue</li> <li>6. Select legal references and catalogueue which branch/body of laws is/are involved but also technical standards regarding a specific situation</li> <li>7. Describe legal concepts linked to electronic records management and archiving</li> <li>8. Formulate examples with respect to the concerned examined situation</li> </ol> <p>Choose a technical-legal solution and justify it on a technical-legal basis.</p>
<b>Continuous assessment (50%)</b>	Home readin analysis (20%); Sitting written exam I (40%); Sitting written exam II (40%);
<b>Final exam (50%)</b>	Written exam

## Bachelor 3 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE2 - RMAS 304 - A Digital History</b>
<b>Professor on Assignment</b>	Prof Dr Pascal Griset – Sorbonne Université (Paris)
<b>Dates</b>	4-16 September
<b>Course description</b>	<p>The course will provide students with the main historical landmarks and concepts that will enable them to understand the evolution of the place of information and communication in our societies up to the present time. At the center of the reflection will be the question of the "digitization of society". It will be a question of understanding these technologies from a complementary perspective structured by four main axes:</p> <ol style="list-style-type: none"> <li>1. The innovation-based approach that allows technical, economic and commercial issues to be properly addressed</li> <li>2. The approach through politics to highlight the issues related to power and freedoms</li> <li>3. The geopolitical approach that will highlight the relationship between powers and the key role of the United States in this field</li> <li>4. The cultural and societal approach will lead to analyses that focus on creative issues but also on freedoms and privacy</li> </ol> <p>The course will be based on a lively presentation of events and will define the main concepts related to the "digitization" of society. Specific examples will be developed to link the topics covered to the future career of students. The evolution of archives and their use, Web archives, "digital" history will thus be specifically addressed through exercises directly linked to current practices.</p> <p><b>Four thematic dossiers (Focus)</b> will be discussed to give students a very precise overview of the 19th and 20th developments in organizations and methods of document storage. Kindly find in the course schedule, these 4 main focuses. These topics will enlighten points directly linked to students' future professional activities.</p> <p>Technological issues will be addressed in such a way as to understand the global logic of this field. The course does not require any specific computer knowledge</p>
<b>Course learning outcomes</b>	<ol style="list-style-type: none"> <li>1. <b>Appraise</b> the evolution of archives and their use, especially the digital and the Web archives</li> <li>2. <b>Argue</b> about the digitization of society from different viewpoints (economic, commercial, geopolitical and technical)</li> <li>3. <b>Value</b> and Judge the importance of the digital revolution and the use of new technologies in the way to produce information, to collect them and to disseminate them in the current societies</li> <li>4. <b>Argue</b> through a critical and analytical essay from a wide range of digital documents related to the aforementioned topical issues</li> </ol>
<b>Continuous assessment (50%)</b>	In class assignment (30%); in-class presentation (40%); report (30%)
<b>Final exam (50%)</b>	Essay questions (3hrs)

## Bachelor 3 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE3 - RMAS 305 - Independent research project: research methods and design</b>
<b>Professional on assignment</b>	Dr Forget Chaterera, Assistant Professor - SUAD
<b>Dates</b>	Semestrial
<b>Course description</b>	This course covers every range of technics and methods used in academic research from the subject definition to the independent professional research project. It includes study of the academic formal (bibliographic records, independent research project, formatting...) and intellectual (information and documentation gathering, problematization, writing process...) requirements. This course prepares to the final independent research project and thus focuses on archival cases studies. From professional archival examples (internship missions, contemporary questions or controversies), students conduct every step of a research and perform its various kinds of presentation (short definition, oral presentation, article review, independent research project).
<b>Course learning outcomes</b>	<ul style="list-style-type: none"> <li>• <b>Assemble</b> and organize information from various perspectives</li> <li>• <b>Select</b> and critically analyze academic and professional documentation and information sources</li> <li>• <b>Formulate</b> and evaluate research questions</li> <li>• <b>Develop</b> precise examples on contemporary archival theories and practices</li> <li>• <b>Argue</b> theoretical and practical case studies</li> <li>• <b>Develop</b> a personal thinking on contemporary archival subjects</li> <li>• <b>Write</b> a professional documentation</li> </ul>
<b>Continuous assessment (50%)</b>	In class assignment (40%) In class presentation (30%) Report / homework assignment (30%)
<b>Final exam (50%)</b>	Independent Research project

## Bachelor 3 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE 4 - RMAS 306 - Applied work IV - Visits and technical reports</b>
<b>Permanent staff</b>	Dr Victor Kabata and Dr Mehluli Masuku
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This applied work will give an overview of the different kinds of archival departments or institutions in UAE, both in public and private sector, including banks and service providers in the field of archives and document management. The aim is to visit 3 locations mainly, one private another public and a third one has to be selected by the students themselves according to its professional goals in a public or private company. This choice has to be approved by the supervisor. We schedule to organize these visits from September to December, in link with the academic in charge of the course devoted to Daily Operations of archival departments and buildings. A first class will provide to the students the methodology of the field visits and to help them to write their reports.</p> <p>During the visit the student assess the records management system (from the creation of document until the transfer to the archives unit in the institution and the existence of the tools like policies, procedures, classification system and retention schedules and the software used for the records management system in each company visited. The student also evaluate the condition of storage (firefighting system, A/C, type of the shelves...)</p> <p>After each visit, a report based on guidelines provided to the student during the first class is required. To do so, the student need to have some academic prerequisites taught during previous courses (RMAS 301, 107, 208, 204) Students will be sensitized to assess innovation and entrepreneurship thinking and tools of the companies they will visit, in their report. They have to devote one section of their report about the innovative challenges that the companies implemented or should implement in the future. They have to retake the elements studied in the RMAS 102 course and check if the company complies with the legal framework. A benchmarking study between the different companies visited by the students will be requested in the third report to analyse the value of the innovation in the companies and the will propose some solutions to improves the potential shortcomings.</p>
<b>Course learning outcomes</b>	<ol style="list-style-type: none"> <li>1. Value how is organized an archival institution or department</li> <li>2. Appraise the different premises such as existing records management system, storage rooms, reading halls and laboratories</li> <li>3. Prepare a detailed and analytical report on a field visit to an archival institution or department</li> <li>4. Justify and measure the software used for the records management system in each visited institution and company</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Analytical report for public company (30%)            Analytical report private company (30%)            Oral presentation (40%)</p>
<b>Final exam (50%)</b>	NA

## Bachelor 3 Semester 1 2021-2022

<b>Course code and title</b>	<b>UE1 - RMAS 307 - Promotion &amp; dissemination of archival resources</b>
<b>Permanent staff</b>	Dr Victor Kabata, SUAD, Postdoc
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This course aims to give students a general and practical knowledge of public communication and welcoming. The public of Cultural institutions in general and Archival institutions in particular has changed dramatically during the last twenty years. Our way of welcoming and challenging them must consider the new communication and information devices that have become a huge part of our cultural and personal lives. Traditional exhibitions and reading rooms must not be overlooked, but websites and social media are now more significant today.</p> <p>New medias are necessary as much as news tools that permit the archivist to know the public and also gain a wider audience for all the resources he preserves. The users have many faces: the way they use, chose, study, disseminate records and archives have to be assessed. Stakeholder analysis is mandatory to offer the professionals to define to use right media and to offer the most appropriate service. Its purpose and utility are also to improve public outreach projects, to discover new opportunities and new ways to communicate with various publics.</p> <p>The course includes a presentation a large range of activities and communication: reading rooms, exhibitions, websites, educational activities, social networks. It offers a wide overview of projects currently implemented and will encourage students to disseminate data and documents in the digital world, by giving a large. For their final assignment, they will have to choose and realize a promotion project of archival resources.</p>
<b>Course learning outcomes</b>	<ul style="list-style-type: none"> <li>• <b>CLO 1: Develop</b> methods of welcoming the public and their different uses depending on the prospective purpose and audience</li> <li>• <b>CLO 2: Identify, analyze and target</b> user needs</li> <li>• <b>CLO 3: Appraise</b> the role of online and physical resources in the implementation of public communication</li> <li>• <b>CLO 4: Create</b> basic outreach and education activities</li> <li>• <b>CLO 5: Select</b> and use tools for managing and exploiting digital collections in order to organize the communication of an archives collection</li> <li>• <b>CLO 6: Design</b> a promotion project an archival collection</li> </ul>
<b>Continuous assessment (50%)</b>	<p>Written assignment (10%)            In class teamwork (25%)            Homework and in class oral presentation (15%)</p>
<b>Final exam (50%)</b>	3hrs exam

# Syllabi courses

## Bachelor 3 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE 1 - RMAS 308 - Managing records and archives in the Information Society: use cases and social uses</b>
<b>Permanent staff</b>	Dr Mehluli Masuku, SUAD, Postdoc
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>The main purpose of this course is to contribute to the intellectual formation of future records managers archivists by making them know the global impact of their activity and of the major challenges they will have to face. They are actually at the heart of the information society and must be aware of the consequences of the dissemination, protection and commercial use of institutional and personal data, of the legal debates that they may pose, of their historical dimension and of the memorial debates or environmental issues.</p> <p>Theoretical researches and many practical use cases will be associated. The purpose is to give examples of solutions adopted in the processing of data or documentary holdings in a range of situations and sectors of activity and to analyse recent cases and scandals (such as the Cablegate...), in order to raise the consciousness of the students about their role in educating records and archives daily users. Various challenges and social dimensions of the profession will be successively discussed and the national and international framework in which they can act outlined.</p> <p>Taught during the last semester of the Bachelor, this course also has a practical dimension: it supplements the visits in various institutions (semester 5) and directly precede an internship (semester 6).</p>
<b>Course learning outcomes</b>	<ol style="list-style-type: none"> <li>1. Be prepared to work in a worldwide professional environment</li> <li>2. Select methods for external archives communication</li> <li>3. Comply to the rights in disseminating information</li> <li>4. Organize the support or training for archives and records users</li> <li>5. Manage new challenges based on practical cases studied</li> </ol>
<b>Continuous assessment (50%)</b>	<p>Websites analysis (20%) Case study analysis (30%) Teamwork and in class presentation (50%)</p>
<b>Final exam (50%)</b>	3hrs exam

**Bachelor 3  
Semester 2**  
2021-2022

<b>Course code and title</b>	<b>UE 2 - RMAS 310 - Cultural Heritage Management</b>
<b>Professor on Assignment</b>	Dr Forget Chaterera
<b>Dates</b>	Semestrial
<b>Course description</b>	<p>This course introduces students to the basics of the management and preservation of heritage resources in the UAE and beyond, and creates a basis for further study in the heritage field. Students study types of practice and current and emerging issues, as well as the social context, controversies, ethical questions, records management and general concerns that characterize efforts in heritage preservation and the work carried out in museums, archives, historic places and interpretive centers. It also discusses how government and non-government organizations preserve and use heritage resource. This course is also linked to the valorization and dissemination issue of archival resources and how they can be used in the cultural heritage in the UAE.</p> <p>The implications and consequences of the theorization of heritage as a cultural practice concerned with negotiating the tensions between received and contested identity has consequences for both academic analysis and heritage practice and policy.</p>
<b>Course learning outcomes</b>	<ol style="list-style-type: none"> <li>1. <b>Argue</b> about the basic terms in Heritage</li> <li>2. <b>Judge</b> the different threats heritage is currently facing</li> <li>3. <b>Evaluate</b> the basic practical mechanisms of heritage management, including interpretation and presentation</li> <li>4. <b>Examine</b> and compare ethical issues related to heritage management</li> </ol>
<b>Continuous assessment (50%)</b>	Oral presentation (20%) Mid-term exam (20%) Participation (10%)
<b>Final exam (50%)</b>	2hrs exam

## Bachelor 3 Semester 2 2021-2022

<b>Course code and title</b>	<b>UE 3 - RMAS 311 – Professional Internship</b>
<b>Professor on Assignment</b>	Dr Forget Chaterera, Dr Mehluli Masuku & Dr Victor Kabata
<b>Dates</b>	Semestrial
<b>Course description</b>	<p><b>Duration:</b> 6 to 8 weeks.</p> <p><b>Description:</b> The internship is a mandatory unit, scheduled in the last semester of the Bachelor in the Records Management and Archival Science (Semester 6), after the first Final examination session. Depending on the timetables, the internship starts end of March, and runs for at least 6 weeks. The student will be exposed to a work environment, and must work in an independent way on a topic related to the records management and the archiving. The place of the internship will be determined according to the professional goals of the students and the availability in the private or public entities. The professional network of the National Archives will be used to propose some high quality internships to the students, especially in the UAE. We already received some proposals from the Louvre Abu Dhabi, Constellio, Agility, Ministries... At the end of the internship, the student writes a report and defends his/her work during an oral presentation. Both parts of this work are used for assessing the internship.</p> <p><b>Expectations:</b> The purpose is to expose the student to the work environment. He/she should also understand how a team or a company is organized, should understand the rules and constraints imposed by the type of activity conducted, and should take part to projects or activities conducted by the company or institution. He/she must also show that he/she can work independently. Students will learn to apply their knowledge to appraise, to collect, to classify, to describe, to manage and to preserve authentic records and/or archives in all medias to serve business, economic, administrative, cultural or/and legal needs of the public or private institutions in which they will be. In this framework, they will have to highlight their ability to apply innovative and entrepreneurial thinking and tools on the ground by personal initiatives. In the evaluation sheet, the professional supervisor and the academic will assess these soft skills. For the defense, they will be expected to set goals and strategies for their own careers and it will be one of the criteria defined in the evaluation sheet to comply with Stanford I&amp;E expectations. Before the beginning of the internship, students will be told what the expectations are in terms of assessments and they have to perform on the ground.</p> <p>The student will be assessed on his/her capacity to master and present the project he/she is involved in, giving a clear picture of the context, of the technical features, and of his/her mission and results or achievements. One of the main expectations is for the student to show an independent and proactive attitude.</p> <p><b>Mentors:</b> The intern will have two mentors:  - A mentor from the institution or company he/she is part of for the internship, who will follow his/her activity and give him/her the needed information and guidance to conduct the work assigned. - A mentor from SUAD, who will follow up his/her activity, give advice about the report and the defense, and scientific or technical guidance if needed.</p> <p><b>Report:</b> - The student must write a scientific report: a formal document presenting the project, its background, the technical features, the mission, the results and conclusions. - The report must be submitted a few days before the defense (to be determined when the date of the defense is known). - The student will be asked to prepare a short description of the internship: a template will be provided on time. This short-description will be submitted with the report. - The report will be assessed by the Faculty members – except for the SUAD mentor.</p> <p><b>Defense:</b> - The defense is about 30 minutes long. - The panel is made of SUAD faculty members and mentor(s) from the institution or company. - The defense will be scheduled in the first week of July (between the 2nd and the 6th of July). - The student will present his/her work during 20 minutes, and answer questions for the remaining time. - The presentation will be assessed by the Faculty members – except for the SUAD mentor.</p> <p>Documents expected from the company or institution:  - At the beginning of the internship: a short description of the work or mission given to the student. - At the end of the internship: an evaluation form (provided by SUAD) about the student's work.</p>
<b>Course learning outcomes</b>	<ol style="list-style-type: none"> <li>1. <b>Evaluate</b> the records management services inside the company (appraising, collecting, classifying, describing, managing and preserving authentic records and/or archives)</li> <li>2. <b>Demonstrate</b> the ability to perform the soft skills acquired during the bachelor in a practical context</li> <li>3. <b>Design</b> critical proposals to enhance the RM services inside the company or the institution</li> <li>4. <b>Defend</b> and <b>Argue</b> about his/her professional experience</li> <li>5. <b>Implement</b> goals and strategies for their own careers from their professional experience on the ground</li> </ol>
<b>Continuous assessment (100%)</b>	Professional report (70%) Internship Defense (30%)

# Elective courses

## Cultural events

This option allows students to attend three cultural events among the following :

- Movies (Cinemana program, The Space, Warehouse 421)
- Exhibitions (Louvre Abu Dhabi, Museums, Qasr Al Hosn, Manarat Al Saadiyat, Qasr Al Watan library...)
- Academic lectures (NYUAD, Sorbonne University...)
- Preparation of the ICA Congress in 2021

They will have to write reports about each of these events by following the provided guidelines.

## Digital curation

This course asks what it means to be a curator of content online: What is an author? a collection? What are ways we made collections before the digital age? Who is our audience? Examining popular forms of curation, from historical examples to social media (Snapchat, Tumblr, playlists), students examine trends in digitization and open cultural data as they explore what makes a digital object and what constitutes a web-based collection. Surveying a variety of open-content management systems used in the museum and academic sector, students will use, and critique, a common technology for academic curation—omeka.org and neatline.org —and will reflect on digital citizenship through their own social media practices. Students are encouraged to be creative, co-creating new content, remixing, and building upon the “vast and growing digital creative commons.” The course is useful for any student interested in information sciences, content creation, and the GLAM sector (galleries, libraries, archives and museums) but is open to all. Student work includes open, reflective blog writing about curation and web-based exhibits in student web hosting.

## Research methodology in humanities

This course is conceived as a first introduction to research in Humanities. The aim of the course is in the first phase to develop the student's autonomy towards sources : ability to identify them, then find them in the relevant database according to their nature (printed, iconographic, digitalized), understand them using the proper material and conceptual tools, and retrieve relevant information as well as summarize the ideas and point of views or analytical angles expressed in them. They will be particularly trained in the correct use of internet sources and verification of information. In a second phase, the student will learn how to incorporate these sources following proper rules in his own research, on a in the realm of Arab and Middle-Eastern Studies assigned by the instructor. The students will be presented with the ethics of quotation in academic research, and the technicalities of using primary and secondary sources: in-text referencing, footnotes, endnotes. Basic rules of transliteration of Arabic will be taught and applied. In a third phase, students will learn about the outcomes of humanities studies and possible achievements in the field of academic research. Sessions are 2 hours long, except for referencing rules and transliteration sessions, 2.5 hours.

## Introduction to records management IT tools

This course covers first, the theoretical concepts of electronic data management systems, their benefits and added value for companies and different organizations. In addition, the course will include workshops on how to practice these concepts with an electronic platform. It will include as well, the study of practical cases through different challenges and stakes, in terms of managing efficiently manual and electronic data.

## Languages

Students have the opportunity to learn a foreign language or to enhance their linguistic skills. The following languages are available: Chinese, English, French, Italian, Spanish, German, and Arabic. According to the level, courses are delivered on Mondays (4:30pm to 6pm) and Tuesdays (3:00 pm to 4:30 pm, 4:30 to 6 pm).

A placement test (to assess the level) will be held during the integration week (1st to 5th of September) to create students groups by level. It is impossible to change your language during your academic years if you do not reach the top level (level 4). Once students are in groups, it is not possible to change.

No student can stay more than two semesters in the same level and when he gets a grade higher than 15 out of 20, he has to go in the superior level. It is forbidden to be enrolled in a class where your mother tongue is taught.

## **Sports**

The Sports department offers a wide range of sports that students are able to do either freely (personal training) or to choose it as an optional course (2 ECTS). These optional courses are delivered from 6:00am to 10:00pm according to the sport. Only one optional sport course is eligible.

Sports courses and activities :

- During the full academic year, over 20 different sports are offered on and off-campus under the supervision of expert trainers
- One eligible sports course can be included in your academic curriculum
- Unlimited access to the sports building in the case where you do sport on your own from 7am to 10:30pm, every day of the week

## **Registration**

Book an appointment with the doctor at the infirmary/medical clinic to receive your mandatory medical certificate of physical capacity that will allow you to enroll in Sports activities.

Fill out a form and provide the following documents:

- 2 pictures (copies are possible)
- A copy of your ID student card
- Your sports card will be issued and printed

Timings and locations are available on the website: <https://www.sorbonne.ae/sports/>
